

HSE Policy

Titan Wind Energy (Denmark) takes an active account regarding both the environment and the work environment. Through this, the factory will assess all HSE impacts in all decisions. The purpose is that we through preventive barriers and improvements will reduce the impact of our surroundings and secure a good work environment

Titan Wind will:

- Through an HSE oriented management seek that Titan Wind's activities will have as little as possible impact on HSE matters
- When choosing material, new technology, investments etc. consider HSE by involving the work environment groups.
- Seek a reduction of the impact of the environment by reducing the use of energy and raw materials and through information and training secure that as much as possible waste is recycled.
- By any means secure compliance of legislative matters
- Securing the involvement as much as possible of the health and safety related work to prevent injuries and to secure that all health and safety related matters are taken into account in order to make this a part of the daily business
- Secure continuously the commitment of improving the health, safety and environment, and expect all employees to take part of this to learn from own and others experiences.
- Secure that all employees know their obligation to be conscious of their own and their colleagues work environment and must take action, if dangerous situations occur.
- Titan Wind Energy (Denmark) is committed to continuous improvement and updating of the management system.

General Manager

Objectives and targets, HSE

Objectives

- Through implementation of OHSAS 18001 secure that the level of all work environmental matters is handled, and corrective/preventive actions are established
- Measure the level of sickness to establish any necessary actions if needed.
- Through implementation of ISO 14001 spreading and raising the knowledge, what internal and external environment is, and the importance of knowing the impact the factory provides to the environment.

Targets

- Sickness rate of max. 2,5% for all employees
- Injury index of max. 25 (measured by LTI's/m working hours)
- Register at least 150 near misses per year
- Ensure that at least 75% of all waste is recycled.
- Save 10% of energy in 2018 compared to 2017, measured by kWh / per counted hour.
